Guardrails

iFlex Slide Gate

Slide Gates provide access openings for pedestrians and vehicles at certain points within barrier sections.

The gate creates a physical stop to prevent pedestrians and drivers travelling straight through a gap or crossing point. The telescopic sliding motion optimises space and can remain open; ideal for vehicle entry and exit into areas.

Compatible with all Pedestrian Guardrails and combined Pedestrian and Traffic Guardrails, they can be installed on their own or in pairs to increase the size of the opening.

Ergonomic design with no sharp edges.

Environmentally friendly and 100% recyclable.

Self colored and UV stabilised for continued high visibility and long lasting aesthetics with no repainting.

Memaplex™ advanced polymer created from an exclusive composition of the most sophisticated polyolefins and rubber additives, expertly blended for unequalled durability.

Space optimisation and zero route obstruction when gate is open, enabled by telescopic slide operation.

Ultra-low maintenance material is chemical and water resistant, non-corrosive, non-scratch and self coloured so no repainting, rusting, flaking or corrosion.

Twin-gate option allows the gate to be installed in pairs to provide a maximum opening of 157 1/2 inches.

Stay-open function Enables fluid traffic flow when route access is needed for a prolonged period of time.
