

TEMPORARY ACCESS IS NOT A PERMANENT SAFETY PLAN

Temporary Scaffold Access

Useful for projects,
risky as a long-term solution

- Temporary structure
- Higher inspection burden
- Not ideal for routine access
- Exposure to weather, movement and site changes
- A workaround, not a long-term access plan

Permanent Rooftop Stair Access

Engineered for routine use,
OSHA compliance and durability

- OSHA-compliant and pre-engineered
- Guardrails and landings
- Purpose-built, fixed access, stable climbing
- Cleaner site conditions
- Long-term safety investment

Need recurring access to rooftops or equipment?
BIG designs and installs permanent
industrial access solutions.
